

HiTemp140-M12

High Temperature Data Logger with an M12 Probe Connector

The HiTemp140-M12 is a rugged and versatile high temperature data logger featuring an M12 probe connector. Compatible with a wide variety of M12 RTD probe styles, this data logger is capable of measuring up to 850 °C (1562 °F) (probe dependent).

All of MadgeTech's HiTemp140 data loggers are made of food grade stainless steel and can be placed in environments with temperatures as high as 140 $^{\circ}$ C (284 $^{\circ}$ F). The operating range of the data logger body can be extended to higher temperatures when used with MadgeTech's thermal barrier options and suitable probe.

A wide selection of compatible M12 probes are available on the market to choose from, making the HiTemp140-M12 the most dynamic data logger of its kind. With the ability to change probes as needed, this device satisfies a multitude of application needs with one powerful data logger versus the need for multiple loggers.

Using the MadgeTech 4 Software, starting, stopping and downloading the HiTemp140-M12 is simple and easy. To use, simply place the HiTemp140-M12 in the IFC400 or IFC406 docking station (sold separately). Using the software, an immediate or delay start can be chosen, as well as the reading rate. Start the data logger, remove it from the docking station and the device is ready to be deployed. Graphical, tabular and summary data is provided for analysis and data can be viewed in °C, °F, K or °R. The data can also be automatically exported to Excel® for further calculations.

MadgeTech 4 Software Features

- Multiple graph overlay
- Statistics
- Digital calibration
- Zoom in/zoom out
- Lethality equations (F0, PU)

Cooling Flags

Export to Excel

Tabular Data View

Automation

Features

- Measurement Range of -200 °C to +850 °C (-328 °F to +1562 °F)
- ±0.1 °C (±0.18 °F) Accuracy
- M12 Probe Connector
- User Replaceable Battery
- Trigger Settings
- Programmable Start and Stop Time
- · Battery Life Indicator

Benefits

- Interchangeable Probe Connector for Multipurpose Use
- Simple Setup and Installation
- Minimal Long-Term Maintenance

Applications

- Depyrogenation
- Autoclave Verification
- Food Preparation and Processing
- Environmental Studies
- Well Monitoring
- Washer Disinfectors
- Pasteurization
- Many More Applications (Probe Dependent)

HiTemp140-M12

SPECIFICATIONS

Specifications are subject to change without notice. Specific warranty remedy limitations apply. Call (603) 456-2011 or go to madgetech.com for details.

TEMPERATURE		
Temperature Sensor	Various RTD Probes with M12 Connector (Sold Separately)	
Measurement Range	18 Ω to 400 Ω , (-200 °C to +850 °C / -328 °F to +1562 °F) (Probe Dependent) BODY OF LOGGER CANNOT EXCEED 140 °C	
Temperature Resolution	$0.0001\Omega,$ $(0.01^{\circ}\text{C}/0.018^{\circ}\text{F})$ (Probe Dependent)	
Calibrated Accuracy	± 0.0462 Ω (18 Ω to 200 Ω) ± 0.1 °C (-200 °C to +265 °C / -328 °F to +509 °F) ± 0.1 % of Reading (+265 °C to 850 °C / +509 °F to 1562 °F) (Probe Dependent)	
Connector Type	M12 Female, 4 Pin	

GENERAL		
Start Modes	Software programmable immediate start Delay start up to 18 months in advance	
Stop Modes	Manual or Timed (specific date and time)	
Real Time Recording	May be used with PC to monitor and record data in real time	
Password Protection	An optional password may be programmed into the device to restrict access to configuration options. Data may be read out without the password.	
Memory	21,504 readings	
Wrap Around	Yes	
Reading Rate	4 readings per second up to 1 reading every 24 hours	
Trigger Settings	High and Low limits may be set. Once data meets or exceed sets limits, the device will record to memory. Bi-level start and stop triggers can also be programmed. Users can specify the number of readings to take after the device triggers
