

TCTemp1000

Thermocouple-Based Temperature Data Logger

The TCTemp1000 is a rugged, submersible, battery powered, thermocouple-based temperature data logger. This is a stand-alone, compact portable, easy to use device to measure and record up to 16,383 measurements per channel. The storage medium is non-volatile solid state memory, providing maximum data security even if the battery becomes discharged. Its real time clock ensures all data is time and date stamped. The TCTemp1000 makes data retrieval quick and easy even in harsh environments.

With the user friendly MadgeTech Data Logger Software, the TCTemp1000 is easily connected to a PC to download the collected data. The MadgeTech Software is capable of presenting the data in graphic, tabular, and summary formats for reporting. Data can also be exported easily to Excel® for further analysis and calculations.
